Worked on Power BI to form a Dashboard of “Company” Sales Insights to get the clear idea of sales for finding out the mistakes and how to tackle them to increase the profit and revenue of the Company. First Downloaded the Data from GitHub and then imported the Data from MySql Database to Power BI Dashboard, then performed the Data Cleaning and Data Modeling processes then made the Dashboard by the help of Power BI tools.

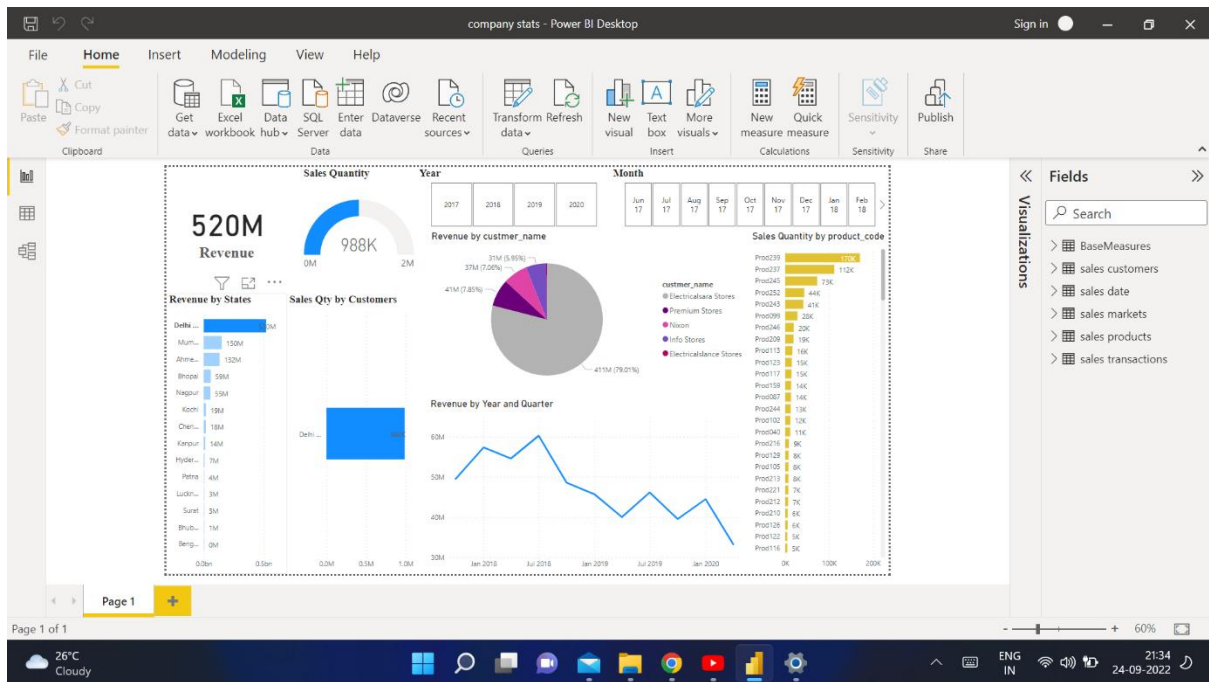

Dashboard:

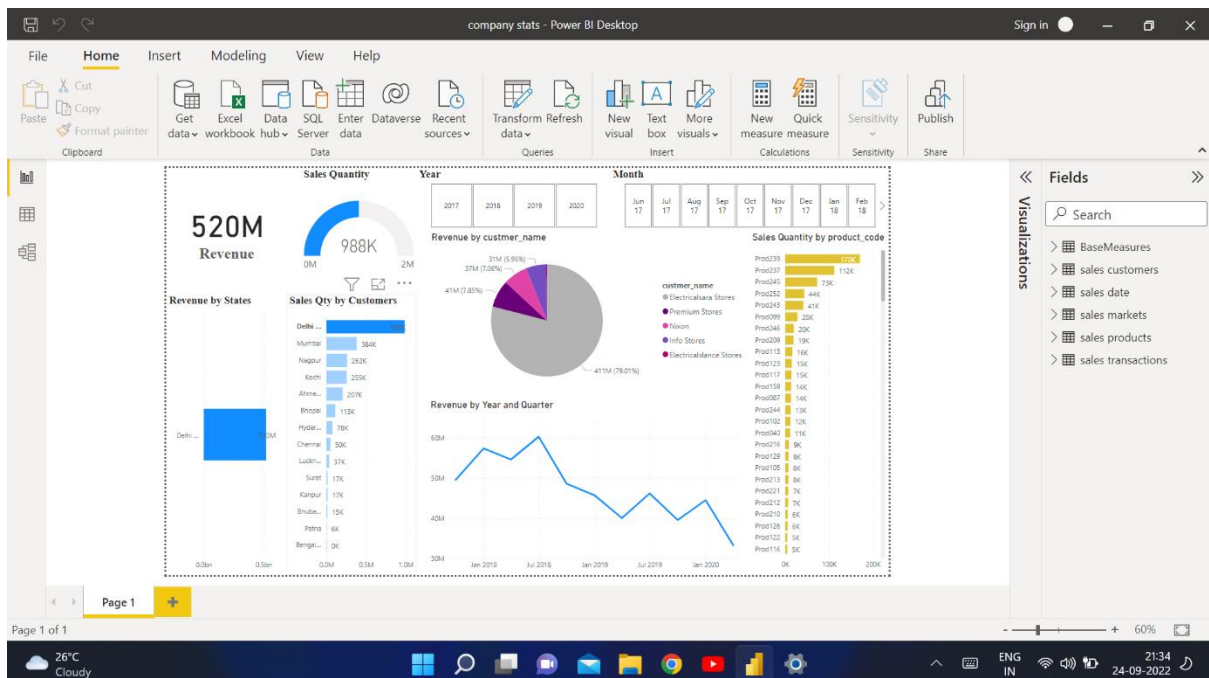

Star Schema:

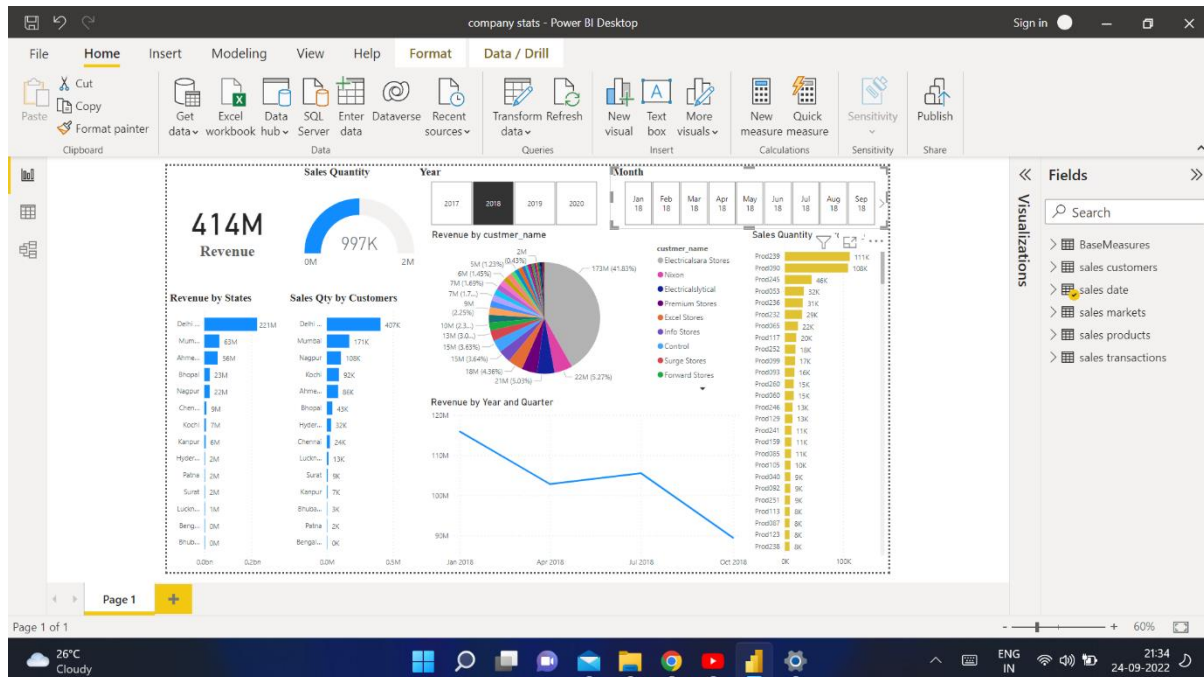

Selecting Data from Revenue by States:

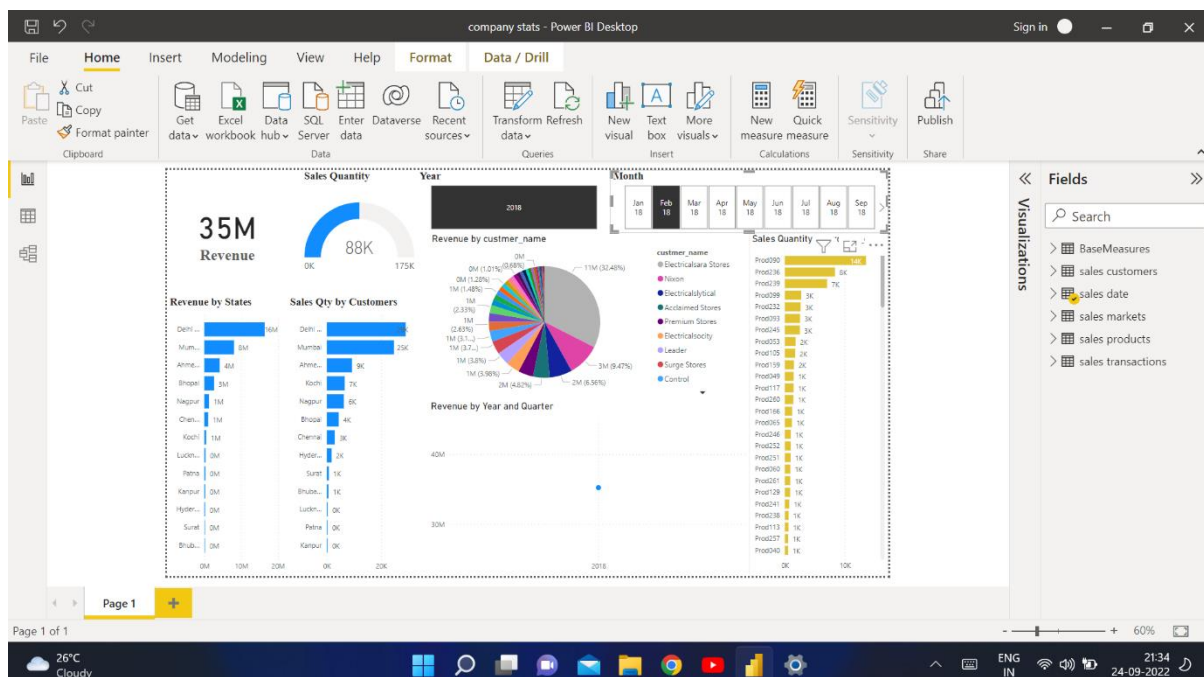

Selecting Data from Sales Qty by Customer:

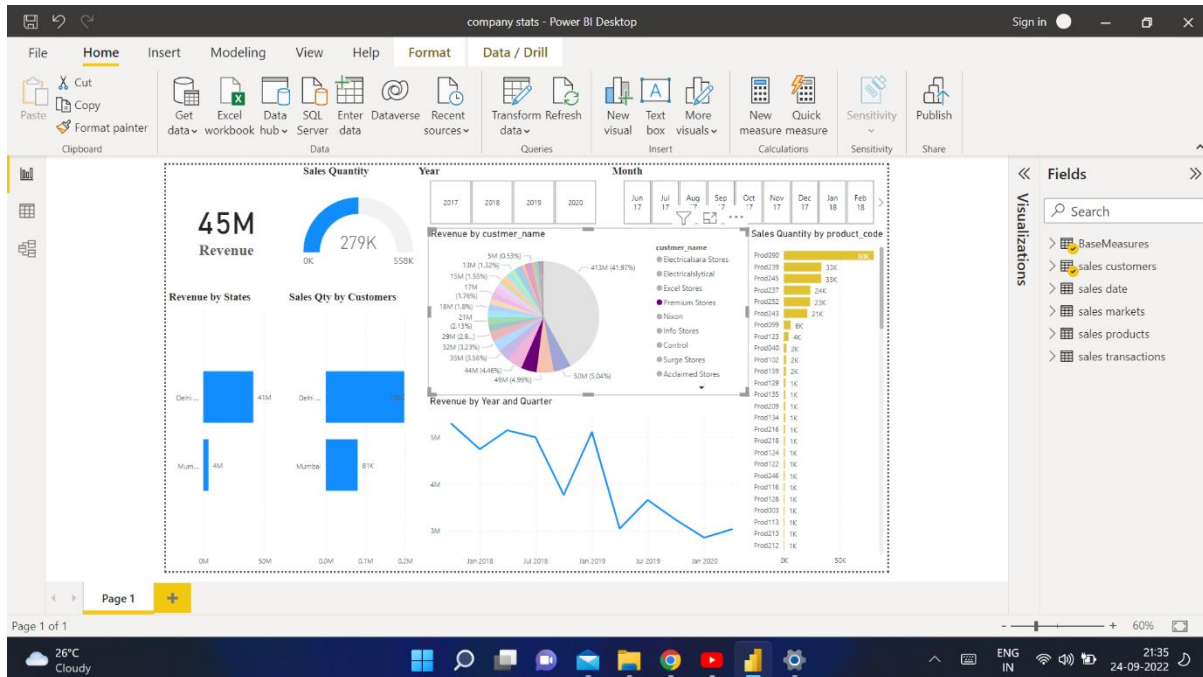

Selecting Data Yearly:

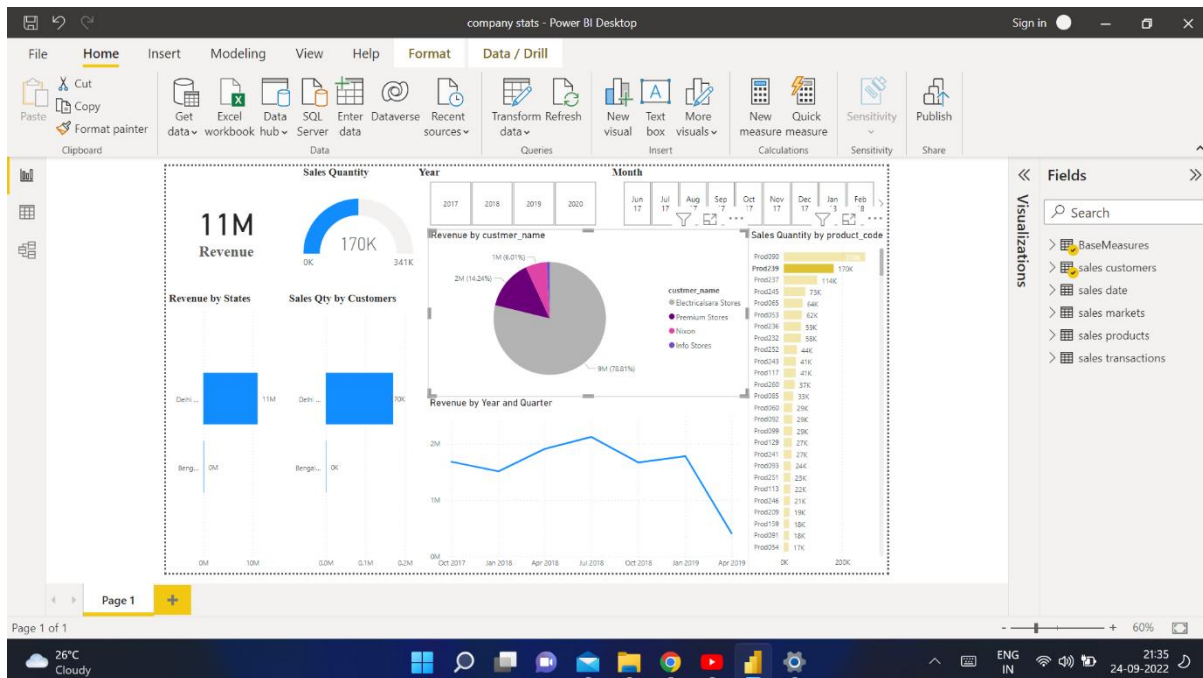

Selecting Data Monthly:

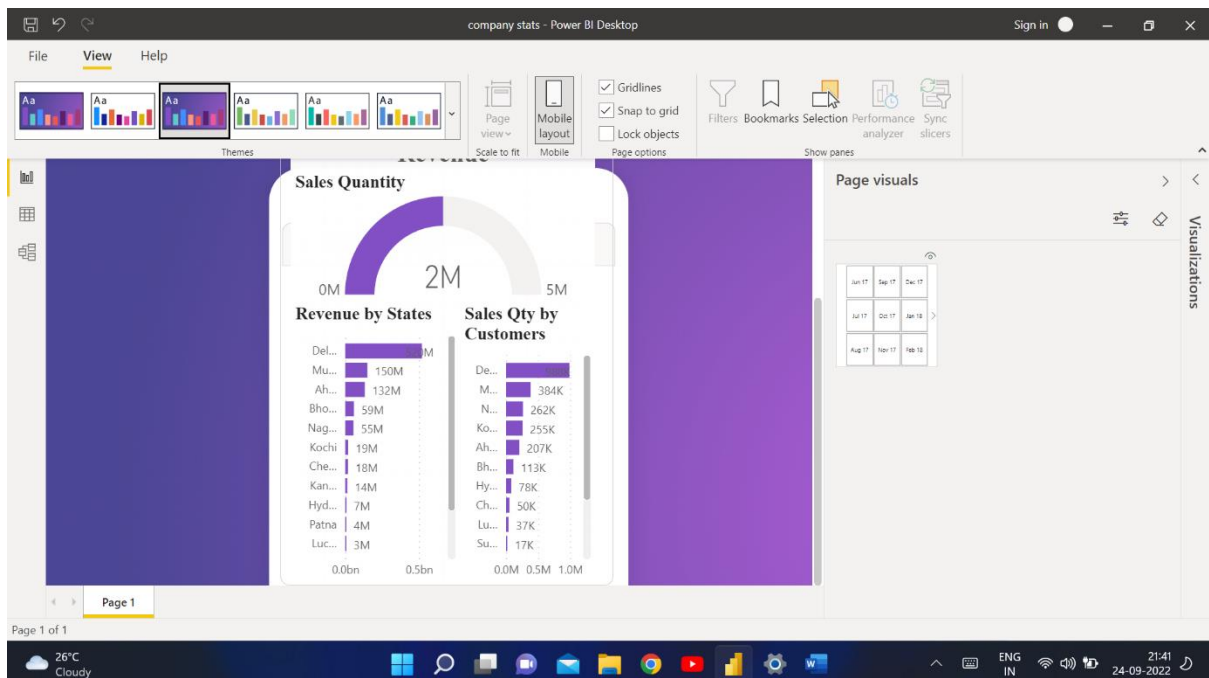

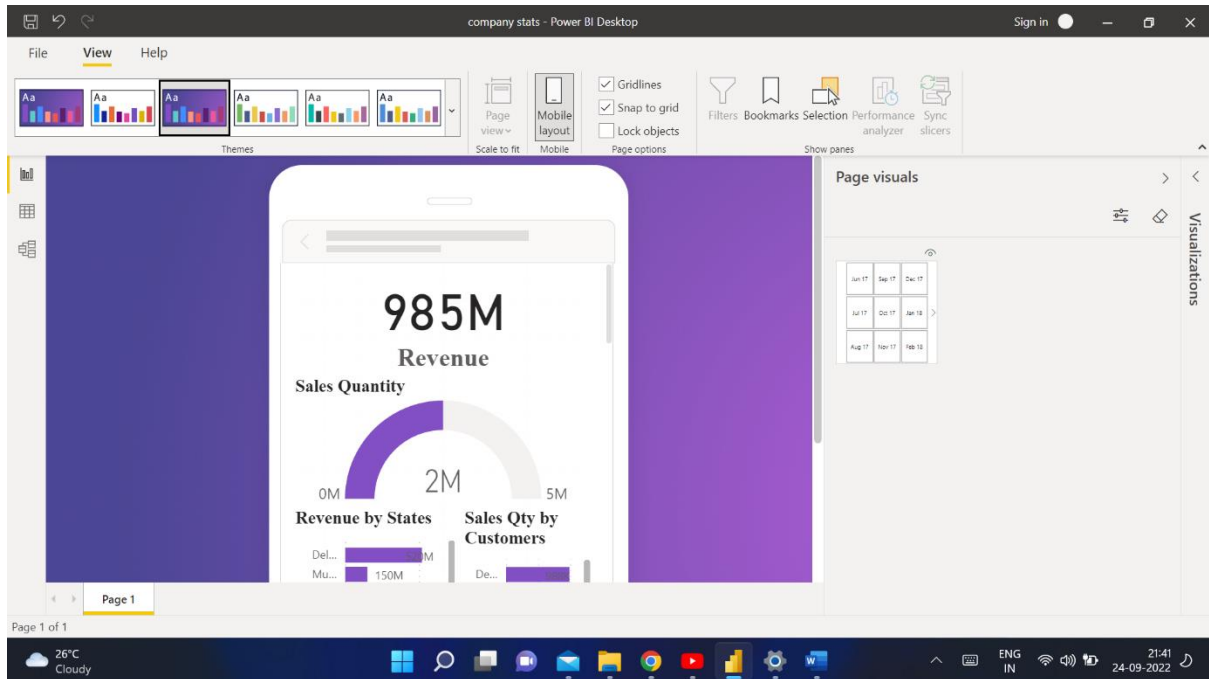

Selecting Data from Revenue by Customer_name:

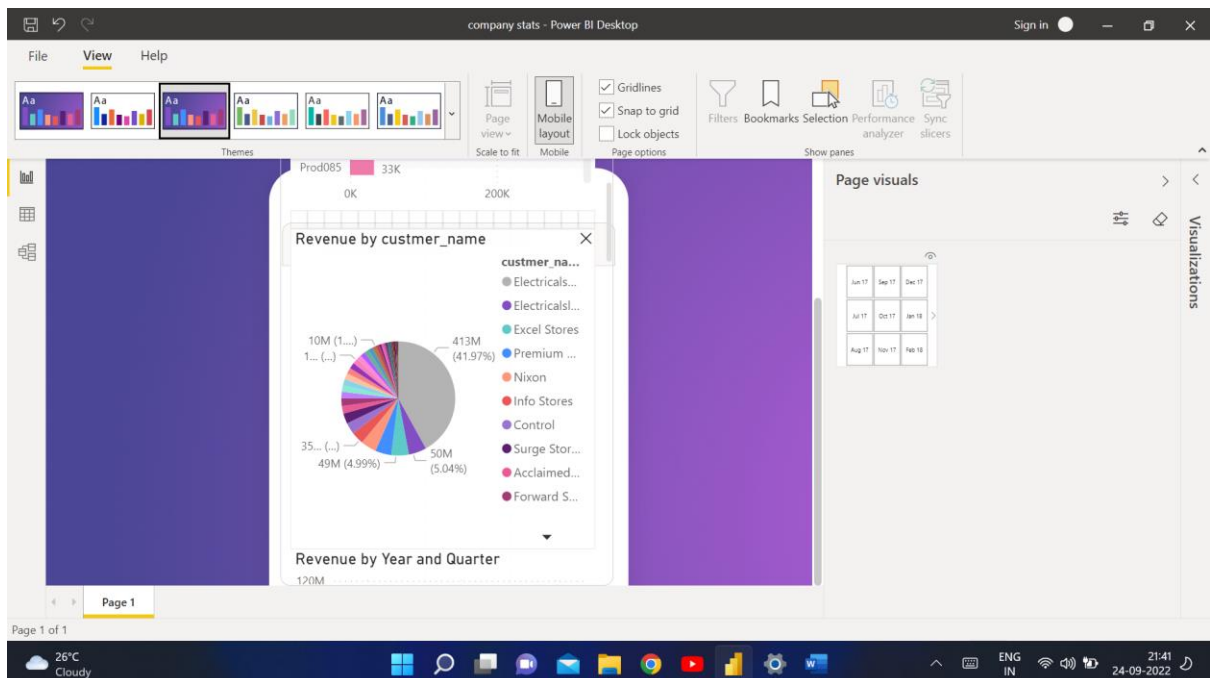

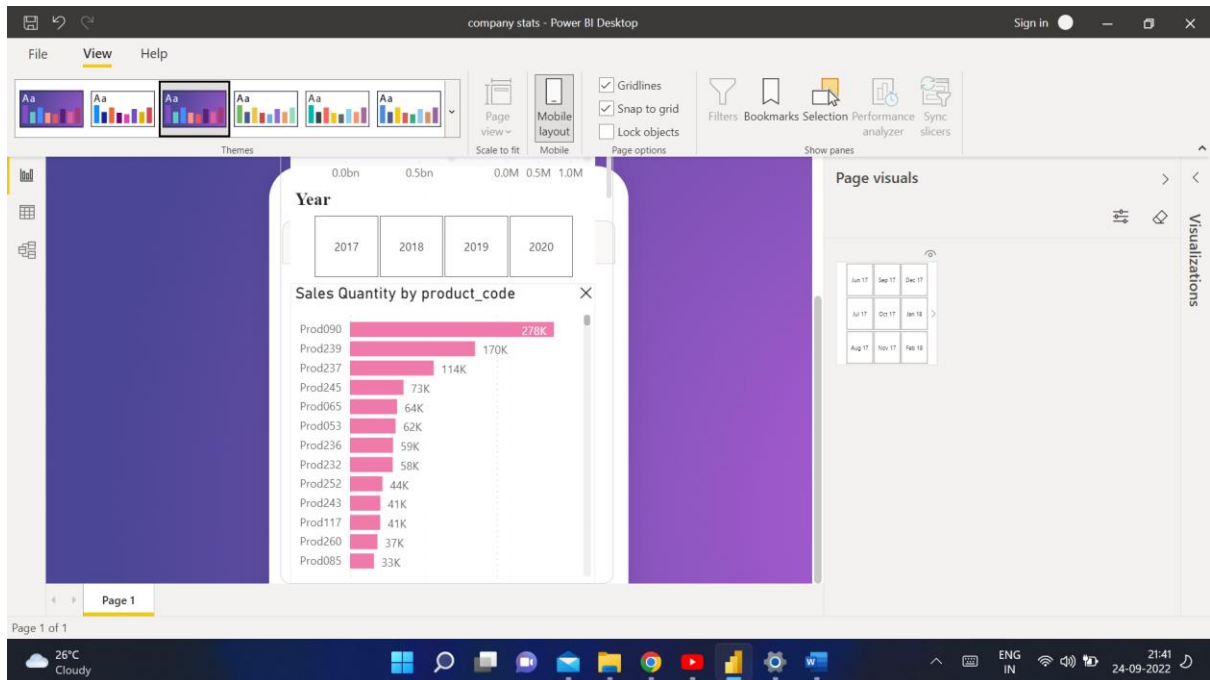

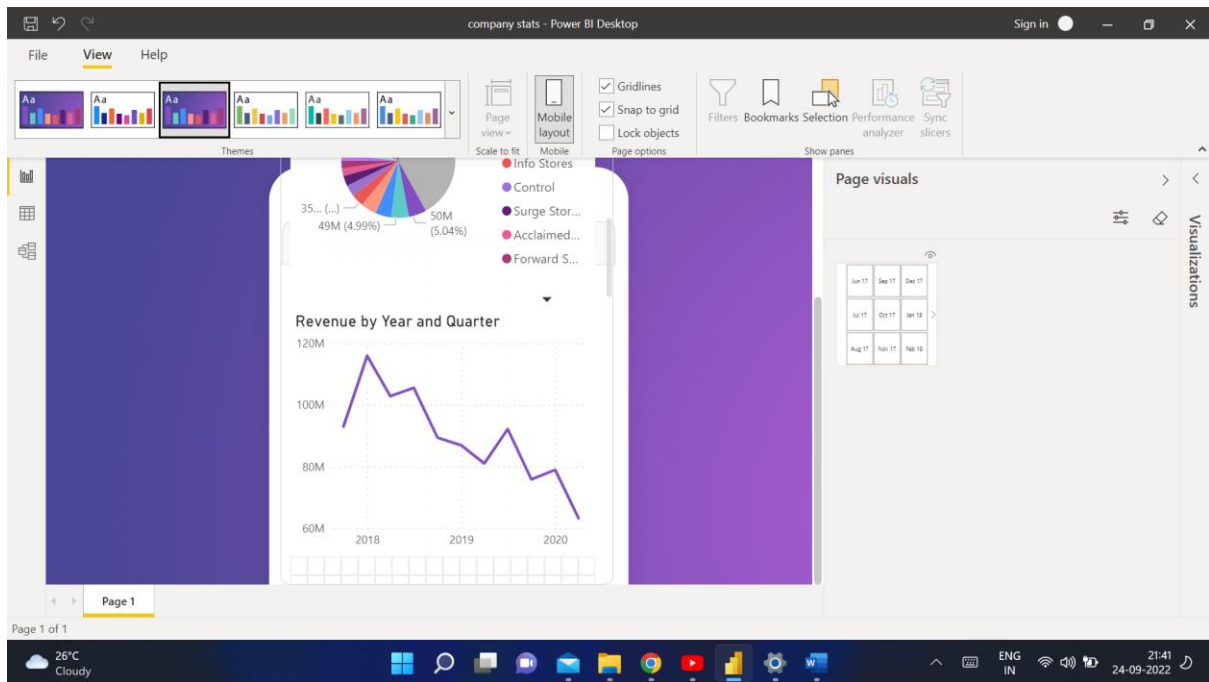

Selecting Data From Sales Quality by Product_code:

Also made **Mobile version** of Dashboard:
